500 kpc

This is a deep optical image of a galaxy cluster, showing a dense field of galaxies of various shapes and sizes. The background is black, and the galaxies are primarily yellow and orange, with some brighter, more distinct ones. A scale bar at the bottom indicates 500 kpc. The image is labeled 'a' in the top left and '1E 0657-56' in the top right. A yellow box on the right side contains the text 'Optical 10'x10'', and a grey box below it contains the authors' names and a reference number.
